

Jordan Demo

Senior Front-End Engineer / UI Developer

PROFILE

Product-minded front-end engineer with a strong eye for layout, typography, and interaction design. I enjoy turning ambiguous product ideas into clear UI flows, measurable performance budgets, and accessible components that scale across teams. I collaborate closely with design systems owners, backend engineers, and stakeholders to ship features without sacrificing quality. I care about pragmatic documentation, meaningful code review, and mentoring teammates through pairing and lightweight RFCs. Outside delivery work I stay current with the web platform, tooling, and responsible use of AI in engineering workflows.

EXPERIENCE

Lead Front-End Engineer – Nimbus Analytics (demo)

2022 – Present

B2B analytics platform used by operations teams at mid-market companies. I own the web shell, navigation, and shared UI primitives used across six product areas.

Key achievements:

- Cut median LCP on primary dashboards from 3.8s to 1.9s using route-based code splitting, tuned image pipelines, and font-display strategy.
- Shipped a token-based design system in React + Storybook with automated visual regression and accessibility checks in CI.
- Partnered with design on WCAG 2.2 AA remediation across high-traffic flows; documented patterns for focus order and live regions.
- Introduced feature flags and staged rollouts for UI changes, reducing rollback incidents during peak season.

This role deepened my skills in performance profiling, cross-team facilitation, and balancing roadmap pressure with sustainable engineering practices.

DETAILS

- Oslo, Norway (demo)
- jordan.demo@example.com

EDUCATION

- University:** Example Polytechnic (demo)
Title: B.Sc. Information Systems and Software Engineering
- University:** Example Summer School (demo)
Title: Certificate in Human-Computer Interaction

SKILLS

Front-End Development:

HTML, CSS, JavaScript, TypeScript, React, Next.js, Vue, Nuxt, Tailwind CSS, Sass, Responsive Design

UI/UX Design:

Figma, Design Systems, Prototyping, Accessibility, Visual QA, Component Design

Tools:

Git, GitHub, Vercel, Cloudflare, Docker, npm, pnpm, Jira, Notion, Slack

AI & Automation:

ChatGPT, Claude Code, Cursor, GitHub Copilot, OpenAI API, Prompt Engineering, AI-assisted audits, Workflow Automation, MCP

Principles:

Accessibility, Core Web Vitals, Performance Optimization, SEO, Semantic HTML, Mobile-first Design, Maintainable Architecture

Content Management Systems:

WordPress, ACF, WPML, Yoast SEO, Headless CMS

Operating Systems:

macOS, Windows, Linux

Senior Front-End Developer – Harbor Studio (demo agency)

2019 – 2022

Digital agency building marketing sites, design systems, and light product UI for SaaS and fintech clients.

Key achievements:

- Delivered fifteen+ production sites on React, Next.js, or Vue with CMS-driven content and component libraries.
- Implemented analytics, consent, and SEO foundations including JSON-LD, sitemap strategy, and Core Web Vitals budgets per client.
- Led accessibility audits and remediation sprints; trained designers on semantic structure and contrast requirements.

Learned to estimate realistically, communicate trade-offs early, and leave each client with documentation they could maintain.

UI Developer – Brightline Health Tech (demo)

2017 – 2019

Patient-facing scheduling and account tools for a regional healthcare network.

Key achievements:

- Rebuilt appointment booking flows with clearer error states and reduced drop-off in usability tests.
- Integrated REST APIs with optimistic UI where safe; added retry and offline messaging for flaky networks.

Junior Web Developer – Pixel Foundry (demo)

2015 – 2017

Small studio producing marketing sites and WordPress themes for local businesses.

Key achievements:

- Implemented responsive templates from Photoshop and Sketch handoffs using HTML5, SCSS, and jQuery.
- Maintained hosting deployments and basic Linux server configuration for a handful of retained clients.

Foundation years: attention to detail, client communication, and learning not to ship on a Friday without a rollback plan.

CERTIFICATES

2024 Certified Web Application Developer (demo credential)

2022 Accessibility for Teams (demo workshop series)

Internal security awareness completion (demo, no year)

LANGUAGES

English (Fluent (C2)), Norwegian (Professional working proficiency), Serbian (Native), German (Basic)

HOBBIES & INTERESTS

I contribute small patches to OSS UI libraries and occasionally mentor bootcamp graduates through mock interviews and portfolio reviews.

Film photography, Gravel cycling, Home espresso experiments, Indie game jams, Local meetups
